### 环保的英语作文 篇1

Although the world develops much faster and better, the resources on the earth get fewer and fewer. In order to protect them, something must be done.

Save water. Water is the source of life. No water, no life. So it's very important for us to do so. Not only should we protect drinking water and stop polluting it, but also make full use of it.

Save electricity. It is crucial. We can't imagine what the life will be like without it. Everyone should do his best to save electricity. Don't forget to turn off lights or other electric machines when we finish working.

Save forests. They are useful. Please stop cutting them down and use recycled paper instead. Make our world a green one to live in.

Recycle useful rubbish. Plenty of rubbish can be recycled like cans, paper, bottles, and so on. We can save resources in this way.

### 环保的英语作文 篇2

Environmental pollution is a serious social problem. It poses a terrible threat to men's health.

The atmosphere is filthy. The air is thick with dust and burnt oil. Dark smokes are being emitted from chimneys, and choking fumes are being

released from numerous vehicles. Stay a little while in a big city, then wipe your forehead with your handkerchief, it is black. Hang out your

washing on the line to dry, you will have to wash again. Garbage is left to accumulate in unsanitary heaps that attract flies and give off bad smell.

Nor is the pollution confined to air and land. Large quantity of sewage and chemical waste are dumped daily into rivers, lakes and the sea,

which kills millions of fish. Noises coming from honking cars, rumbling machines and broadcasting loudspeakers may make a person nervous and

irritable, even drive him crazy.

Environmental pollution is responsible for many diseases that are disabling, or bringing death to human beings.

In short, let 's take good care of our mother globe, not only for the well-being of ourselves, but also for that of our future generations.

### 环保的英语作文 篇3

人与环境是和谐相处的，我们生存在地球上，人是自然之子，而不能仅把人看作自然的征服者，大家都知道，人类只有一个地球，地球上的山山水水、动物。植物是人类的细胞，如果我们把它损坏了，破坏了大自然的组织，等于消灭人类。因此，环境要与社会公德联系起来，与实践行为作为人格教育的一项重要内容来抓。每个人都要履行保护环境的责任和义务。

Harmony with the environment is that we live in on Earth, who is a natural son, and not only to natural persons as the conqueror, as we all know, there is only one earth and the mountains on Earth, the animals. Plant human cells, if it damaged, destroyed nature organizations, to the eradication of mankind. Therefore, the environment must be linked with social ethics, character education and practice acts as an important element of it. Everyone must fulfil its responsibilities and obligations to protect the environment.

### 环保的英语作文 篇4

How to protect the environment?

Nowadays, more and more people realize it's necessary and important to protect the environment. Also, there are some people who don't pay attention to hygiene and they can't stop littering the rubbish casually or spitting everywhere all the time. And in addition, there are a few factories often cutting down the trees, discharging chemicals and dirty water and so on. And it causes many problems like the Greenhouse Effect. If they do these day by day and our life will be harder and harder, so we have to stop them. To stop them we can put up commonweal advertisements and tell them the detriment of destroying the environment. So we can start from now to make a beautiful life.

### 环保的英语作文 篇5

Throughout history man has changed his physical environment in order to improve his way of life. With the tools of technology he has altered many physical features of the earth. He has transformed woodlands and prairies into farms and made lakes and reservoirs out of rivers for irrigation purposes or hydroelectric power. Man has also modified the face of the earth by draining marshes and cutting through mountains to build roads and railways.

However, mans changes to the physical environment have not always had beneficial results. Today, pollution of the air and water is an increasing danger to the health of the planet. Each day thousands of tons of gases come out of the exhausts of motor vehicles. Smoke from factories pollutes the air of industrialized areas and the surrounding areas of the countryside. The pollution of water is equally harmful. The whole ecological balance of the sea is being changed and industrial wastes have already made many rivers lifeless.

Now environmental protection is more pressing than ever before. As we know, massive destruction of environment has brought about negative effects and even poses a great threat to mans existence. Indifference to these problems will mean committing . Therefore, effective measures should be taken and laws passed to conserve environment. Otherwise,man is certain to suffer from the serious consequences caused by this lack of care for his living surroundings.

#### 环保的英语作文 篇6

Once man did not have to think about the protection of his environment. There were few people on the earth, and natural resources seemed to be unlimited.

Today things are different. The world has become too crowded. We are using up our natural resources, and polluting our environment with dangerous chemicals. If we continue to do this, human life on earth will not survive.

We realize that if too many fish are taken from the sea, there will soon be none left. Yet, with modern fishing methods, more and more fish are caught. We know that if too many trees are cut down, forests will disappear. Yet, we continue to use powerful machines to cut down more and more trees. We see that if rivers are polluted with waste products, we will die. Yet, waste products are

still put into rivers.

We know that if the population continues to rise at the present rate, in a few years, there won ' t be enough food. What can we do to solve these problems?

If we eat more vegetables and less meat, there will be more food available. Land for crops feeds five times more people than land where animals are kept.

Our natural resources will last longer if we learn to recycle them.

The world population will not rise so quickly if people use modern methods of birth control.

Finally, if we educate people to think about the problems we shall have a better and cleaner planet in the future.

Also people has been spoiling the health since the immense quantity of chemicals have been produced and already used in pursuit of convenience and various toxic substances have been produced unintentionally and accumulated in environment. Therefore, We need some countermeasures from the viewpoint to prevent the city environment form disaster and to manage environmental risks. If we pay no heed to the present destructive human activities, our planet will become of tomb instead of cozy home. What ' s more, we should realize that only from our planet can we obtain our sheltering, food, cloth and so forth.
