Hello, my professors. It's a fine day today, and I'm very pleased to meet you here. First of all, I'd like to introduce myself to you. My name is xxx, my hometown is xxx, which is a really beautiful city. Even when I was a young boy, I was very interested in biology science. Every one may have a dream, and I still remember that

my dream is to be a biology scientist (just like ZHU KE ZHEN)。 I liked to make wonders just like,where are we from?Where are we going in the universe?And then i would find the answers in book by myself.Still today i think that interest is the best teacher in one's whole life (and knowledge comes from practice)。

Second, i will introduce my major in the university. My major is Biological Engineering in xxx University. It has a great relationship with biology science. Their relationship can be shown with an example: Just like a river, biology science, which often finds new discoveries and theories, is at the head of the river. And my major, which lays more stress on practical use, seems to be at the end of it. When both of them interact well enough, the discoveries and theories in biology science can be soon turned into products in all of the modern industry.

Four years' university education gives me a lot of things to learn, a lot of chances to try, and a lot of practices to improve myself. It teaches me not only what to study and how to think, but also to see the importance of practical ability (such as doing experiment as much as possible)。 In the university life, i have made many good friends. They help me improve my study and research ability, do everything just like a man, and often give me good example to follow.

have introduced myself above, i also have many interests in my spare time. I like playing football, which is an effective way i think to improve my body health, and it can teach me how to join in a group and deal with other people. Drawing and writing is another favor to me.

Above all, i choose the major in order to broaden my view in biology science, and enhance my research ability. I will do my best to join the new group and be good at postgraduate study.
